

Blocks

Information for all SWDM Blocks

Note: Most blocks will not receive a unique page, rather will be listed in our block directory. If you cannot find information on how to craft a specific block, please check there first. We will do further breakdowns on categories or sets in future iterations of this wiki book!

- [Block Directory - WIP](#)
- [Multiblock Doors](#)

Block Directory - WIP

The SWDM Block Directory is a comprehensive list of all blocks found in the latest SWDM release (1.18)

HOW TO USE

Scroll through this list to find the block you are looking for, get inspiration or use the quick navigation chapter links on the right of this page (or under information on mobile devices). PC users can press control + F to search the page for the desired block. In game, we highly recommend using JEI to see a preview of what these blocks look like!

THIS PAGE IS A WIP AND DOES NOT HAVE ALL INFORMATION OR LINKS TO CRAFTING RECIPES!

Term	Definition
Source Block	Which block is required to craft SWDM blocks and resources
Crafting	Which workbench to use, this is usually the Deco Workbench) or the Stonecutter
Variations	Which blocks and types of blocks (of that category) can be made from the source block
	This source block makes full blocks which then used to craft unique variants (like stairs, slabs)
Colors	How many colors this block comes in
LM	If this block has compatability with SWLM which allows for crafting a 'SW' light block
Version Added	Which version this block was added in COMING SOON

SSWT: STAIR / SLAB / WALL / TRAPDOOR

BSSWTBP: BLOCK / STAIR / SLAB / WALL / TRAPDOOR / BUTTON / PRESSURE PLATE

Multiblock Doors

Information targets the latest **supported** release. For legacy (older) versions and bug fixes, read the changelogs.

Introduction

Multiblock doors support up to 9 x 9 doors (or "windows") with sliding or swing variations.

Crafting

This feature require a hinge item (tool) to create multiblock doors.

Hinge

Iron Ingot (4)

Stick (1)

[Dried Kelp](#) (1)

Check out Brooke's video guide on [here](#) to see the process in audio-visual format.

Step 1: Build A "Template"

This can be your final design, or placeholder blocks for custom textures in Step 3.

- Can be up to 9 x 9 blocks in size, and 1 block in depth.
- Can use any **full blocks**, including transparent blocks like glass or screens.
- Cannot use partial blocks (ladders, panes, bars or trapdoors) - **See Step 3!**
- Cannot have any "cutouts" (missing blocks) - doors must be square or rectangular.

Step 2: Select

Right Click one corner with a hinge in hand, then **Right Click** the **opposite** corner. This outlines the selection in white.

Step 3: Customize

If the selection is a valid size and shape, it will open a GUI (menu).

Set Open Method

Left Click "Slide" to toggle options.

- Slide opens by moving to the side (closed, half open, fully open).
- Swing opens by moving 90 degrees (closed, open out, fully open/folded back).
- Static does not open.

Block Rotations

Left Click blocks in the preview window to modify them.

- Use the circular arrow icons to rotate the `x y` axis texture (ie for logs).
- Use the straight arrow icons to flip the texture vertical or horizontal.

Block Axis Rotation

Horizontal or Vertical Block Rotation

Custom Textures

- Type in the search bar to look up available textures, even partial blocks like ladders.
- Use `<` and `>` to adjust `Width` and `Height` to adjust sizing if required.
- Supports textures added by mods, **even if they are not "registered" blocks.**

More Information: Equestrian Doors (SWEM)

Star Worm Equestrian Mod includes 150 custom bar textures specifically for multiblock doors.

- Flower
- Friendly
- Horizontal
- Medieval
- Vertical

The custom bars are **NOT** items or blocks in the game. The textures are stored in `assets > swem > textures > block`

Tip: You can use *any* textures from the mod, including stall door panels to make your own custom sized stall door designs!

Type	Example	Variants	Colors
------	---------	----------	--------

Flower		Search: bars_flow er - bars_flower_3-4th - bars_flower_connect_left - bars_flower_connect_right - bars_flower_door_left - bars_flower_door_right - bars_flower_full - bars_flower_half - bars_flower_quarter - bars_flower_rounded_left - bars_flower_rounded_right	_light	_medium	_dark
-------------------	---	--	-------------------	--------------------	------------------

Friendly		Search: bars_friendly - bars_friendly_3-4th - bars_friendly_connect_left - bars_friendly_connect_right - bars_friendly_door_left - bars_friendly_door_right - bars_friendly_full - bars_friendly_half - bars_friendly_quarter - bars_friendly_rounded_left - bars_friendly_rounded_right	_light	_medium	_dark
---------------------	--	--	------------------------------	-------------------------------	-----------------------------

Horizontal		Search: bars_hori - bars_hori_3-4th - bars_hori_connect_left - bars_hori_connect_right - bars_hori_door_left - bars_hori_door_right - bars_hori_full - bars_hori_half - bars_hori_quarter - bars_hori_rounded_left - bars_hori_rounded_right	_light	_medium	_dark
-----------------------	--	--	------------------------------	-------------------------------	-----------------------------

Vertical		Search: bars_verti - bars_vert_rounded_right - bars_vert_3-4th - bars_vert_connect_left - bars_vert_connect_right - bars_vert_door_left - bars_vert_door_right - bars_vert_full - bars_vert_half - bars_vert_quarter - bars_vert_rounded_left - bars_vert_rounded_right	_light	_medium	_dark

- bars_medi eval_full
- bars_medi eval_half
- bars_medi eval_quarter
- bars_medi eval_rounded_left
- bars_medi eval_rounded_right

_light

_medium

_dark

Step 4: Build

Left Click "Build" to create the door and close the GUI.

- Places a single door item in the player's inventory.
- Creating a door does not consume the template blocks.

Hover over any door item to view a tooltip with an image.

Placing Doors

Doors show a transparent overlay when held to help guide placement. Right Click to place the door.

Stand on the side you want the **hinge** to be:

- If you want the door to slide or open to the right, **stand on the right.**
- If you want the door to slide or open to the left, **stand on the left.**

Using Doors

Right Click a door to cycle to the next sequence, or use Shift to reverse the sequence.

Sequence	1	2	3
Slide	Closed	Half Open 50%	Fully Open 100%
Swing	Closed	Open Out 90°	Fold Back 180°
Static	Closed	Closed	Closed

Duplicating Doors

Useful if you removed the original template, used custom textures or need multiple copies of the same door.

Shift + **Right Click** a **placed** door with a hinge. Modify the door if desired, then use **Build** to duplicate (copy) it.

Hinge Durability

Hinges lose 9 durability per door and are depleted after 27 uses.

Additional

More Information: Uses, Pathing, Redstone, NPCs

Uses (Ideas)

Multiblock doors have many potential uses.

- Stall barriers, doors and gates for horses.
- Pen or paddock barriers and gates for animals.
- Tall or wide entrance gates for secure property.
- Large sliding or swing doors for barns or warehouses etc.
- Custom entry or internal doors for builds and houses.
- Functional swing or sliding windows.

Pathing

Entities treat doors as an impassible obstacle when it obstructs their path.

Redstone **TBC**

Doors are not redstone sensitive, and cannot be opened or automated by redstone.

NPCs **TBC**

Doors cannot be used autonomously by villagers or other non-player characters (NPCs).

Known Issues

You can report any mod issues to our bugs forum on [Discord](#) - please check for duplicate reports first!

It is not recommended to include multiblock elements in World Edit actions or schematics. If you do, save and backup!

Changelog

View Changes

This is not a complete list of changes or features. It is a log of wiki-related version information and may be outdated.

MC Version	Release	Notes
1.21.1	3.2.4	Feature: Added Multiblock Doors.
