Worm on String

Description: A Worm On String is a passive mob that does not spawn naturally. It was added as a birthday present for SWEM's head animator, Eric.

Details:

Health points:	4
Behavior:	Passive
Hitbox size:	TBC
Spawn:	Summoned or spawned with spawn egg

Spawning

Worms do not spawn naturally, so they cannot be accessed outside of creative mode or without cheats. They may be summoned or spawned with their spawn egg.

Appearance

Worms have the appearance of a large worm on string. All the worms are orange.

A worm.

Behavior

Worms wander aimlessly, slithering from side to side, and sometimes pausing to flick their tails.

Their behaviour is based on the code of Minecraft sheep, which is why it's not uncommon to hear your worm 'bah'... Not a bug. (Well, kind of in that it's an oversight, but not one that we are in a rush to fix. Worms 'bah' - get used to it.)

Known Issues

If you find an issue, please report it to our bugs channel on Discord. We ask that you look to see if your issue was reported first!
