Introduction

This is a guide for players new to Star Worm Equestrian (Lite). If you need a mod installation guide, check out this instead.

Basics - Horses

> Embedded links will take you to relevant sections mentioned in this basics guide if you want to learn more!

- Find horses naturally spawning in many biomes (if enabled) or summon one via **COMMANDS**.
- Tame horses just like you would any Minecraft horse or donkey, but watch out for bucking !
- Craft and equip a bridle **and** saddle to steer the horse when riding.
- Use `H` to increase your gait (speed), and `G` to decrease.
- Craft and equip horse armor to unlock special perks and protections for adventures.
- Ride and jump your horse to increase skills for better stats and less refusals.
- Heal your horse using Horse Heal Potion.

Differences To Star Worm Equestrian ("Full" Mod)

This is not a complete list, but includes the most notable differences:

- `Converting` Horses ("vanilla") **cannot** be converted via Cantazarite potion or any other means.
- `Tack` Fewer items, or "bundled" (saddle, blanket, girth + breast collar in one slot)
- `Care` No hunger, thirst, pee or poo features.
- `Breeding` No gestation (pregnancy delay), foal limits, configurable cooldowns or simple lineage.
- `Decor` Less stable decor and "function" blocks removed (troughs, feeders etc).
- `Ore Gen` Cantazarite and the Cantazarite anvil does not exist, so armor repair uses shining amethyst shards.
- `Configs` Simplified configs with fewer customization options.
