Amethyst Shield

> Information targets the latest **supported** release. For legacy (older) versions and bug fixes, read the changelogs.

Introduction

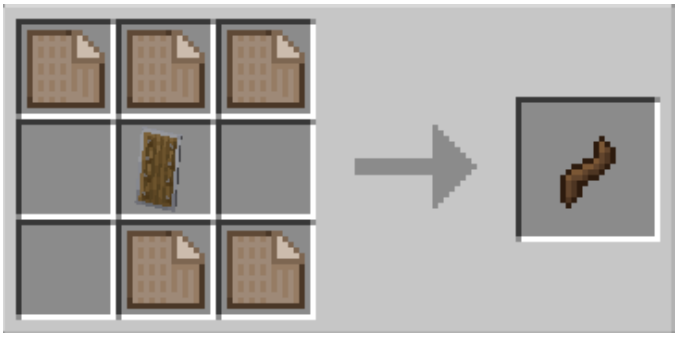

Amethyst shields grant an additional `10` ❤ to the player when held in either hand.

Amethyst Shield	
Durability	506
Stackable	No

Crafting

> Only Amethyst tier can be used in game. Other options are **non-functional** crafting components!

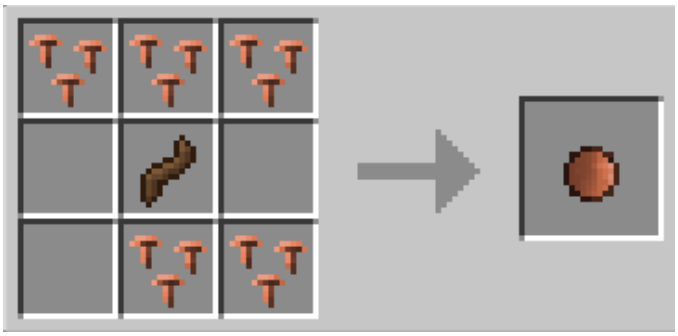

> Crafting components up to gold tier can be found in **LOOT** containers around the world.

Shining Amethyst Shard `(6)`

Netherite Shield `(1)`

Usage

Equip the shield into the main (active hotbar slot) or off-hand **(recommended)** to activate the bonus hearts.

- The additional `10` ❤ capacity will be added immediately, but grayed out.
- The player regenerates ~`0.5` ❤ every 10-15 seconds at the cost of saturation (food).
- Regeneration can be significantly boosted using healing potions.

`Right Click` to actively shield against attacks and deflect incoming projectiles (arrows etc).

> Bonus hearts are lost **instantly** if unequipped. Minecraft views loss of **any** hearts as damage, so the player appears to be "hurt".

Enchanting

Amethyst shields can be enchanted in an enchanting table, or combined in an anvil with mending or unbreaking.

Repair

Amethyst items can be repaired using:

- Shining Amethyst Shard (Anvil)
- Mending Enchantment

Known Issues

You can report any mod issues to our bugs forum on **Discord** - please check for duplicate reports first!

- `1.1.3` Cannot be enchanted in an enchanting table (no compatible enchantments). **Bug Report**
- `1.0.0` Shields have no clear indicator for when the item is held "active".
