Getting Started

> Information targets the latest **supported** release. For legacy (older) versions and bug fixes, read the changelogs.

> This page is a **WORK IN PROGRESS** and may contain inaccurate or placeholder information or links.

Introduction

This is a guide for players new to Star Worm Equestrian Mod. If you need a mod installation guide, check out this instead.

Basics - Horses

> Embedded links will take you to relevant sections mentioned in this basics guide if you want to learn more!

- Find horses naturally spawning in many biomes (if enabled), convert a vanilla horse or summon one via commands.
- Tame horses just like you would any Minecraft horse or donkey, but watch out for bucking !
- Craft and equip tack in the correct order (bridle, blanket, saddle, girth) to steer the horse when riding.
- Use `H` to increase your gait (speed), and `G` to decrease.
- Craft and equip horse armor to unlock special perks and protections for adventures.
- Ride, jump and care for your horse to increase skills for better stats and less refusals.
- Heal your horse using TBC.

Support

You can post any mod questions in our Discord tech-help or gameplay-questions community support channels!

Reporting Issues (Bugs)

You can report any mod issues to our bugs forum on **Discord**.
