Usage

Breast collars are an optional part of any tack set. This tack item can only be used following a bridle; by default you cannot place a blanket on unless the horse has a bridle or halter.

Right click a tamed SWEM Horse with a breast collar in hand to equip it - or open the horse's GUI menu (shift + right click with an empty hand) to place the item in the designated tack spot. If a horse already has a breast collar on, you can easily 'hotswap' it for another by shift + right-clicking with the new breast collar in hand.

> Tack-equip order: Bridle > Blanket > Saddle > Girth Strap. Optional: Breast collar, Leg Wraps, Horse Armor, Saddle Bag

Breast collars do not offer any perks or buffs, and you can use any breast collar with any other riding tack pieces to mix English, Western & Adventure. The only exception is Adventure Breastcollars require a full matching set to use Horse Armor, but once the armor is put on the breastcollar can be 'hotswapped' out for different versions.
