Trivia

Lucy is a staff appreciation coat for Hannah. She was also the well-known and much loved real horse of Hannah and the inspiration for much of SWEM when vanilla Minecraft lacked the true joys of owning and riding horses.

> SWEM started because of a stubborn, green, beautiful horse named Lucy. When family troubles meant I couldn't afford to be with her anymore, all of my love had to go somewhere. I started pouring it into work and games with horses. After crying to my roommate a few too many times about needing to reset the backups because 'Lucy' was blown up by a creeper for the 10th time, I decided to make a mod to make destriers out of Minecraft horses.

Lucy was made as a surprise addition for Hannah's birthday, created by Hauket and finished up by Malli. The coat was designed to closely represent the real-life inspiration. Lucy was presented to Hannah, alongside custom painted Sweetboi and Lucy Breyer models, on a world made for the reveal where Hannah was taken on a trail to read personalised well-wishes from staff and betas. Upon reaching a small ranch with a house and a barn, Hannah met up with her favourite horses; Sweetboi, Jessie, Valley, Novick and Blazie, all grazing in their pasture. After exploring the property, she was shown around back to a roundpen with the extra special gift.

Lucy is not intended to be an acquirable coat, and was added specifically for Hannah as her heart-horse.
