Tracker

Description: A tracker is an item that tells the location of the player's SWEM horse.

Details:

Rarity color:	Common
Renewable:	Yes
Stackable:	Yes (64)
Durability:	None

Obtaining

Crafting
Trackers come in a single color.

A tracker can be crafted with 1 Shining Amethyst Shard, 2 Iron Bars OR Friendly Bars, 1 Enderpearl and 1 Redstone

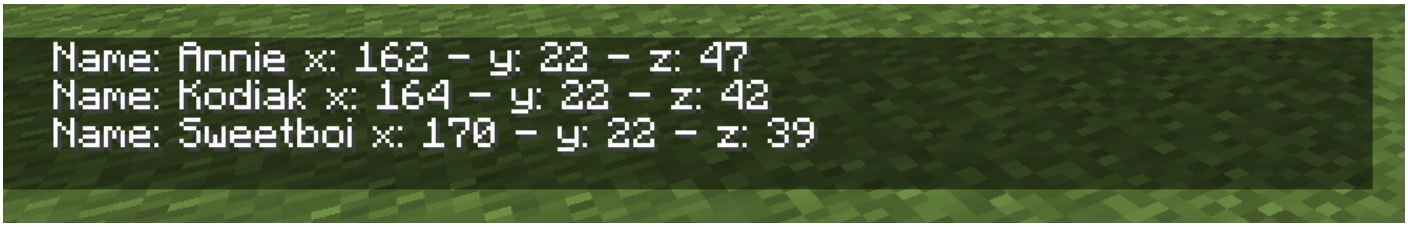

Usage

Right click a tamed SWEM Horse with a tracker to begin tracking it. A confirmation message will appear if successful.

Trackers are personal to you and your tracked horses, but not specific to each horse. You can have one tracker for several horses - if you were to lose that tracker, crafting another would hold the same data. You can right click the tracker at any time to display the last tracked coordinates of your tracked horse(s). If you have multiple tracked horses, you will see multiple coordinates. If those horses are named, the tracker will specify their name and coordinates so you can distinguish between them.

To remove a horse from your tracker, shift and right click the horse with (any) tracker. A confirmation message will appear if successful. Not holding shift will cause you to mount the horse instead.

Known Issue

If you find an issue, please report it to our bugs channel on Discord. We ask that you look to see if your issue was reported first!

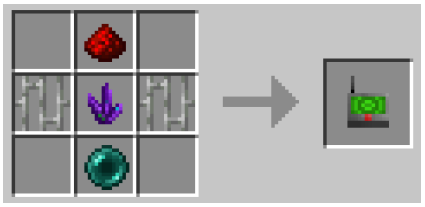

- Tracker cannot be reset and continues to list deceased or transferred horses. **Bug Report**

Changelog

View Changes

> This is not a complete list of version changes / fixes. It is a changelog of relevant wiki-related version information.

MC Version	Release	Notes
`1.18.2`	`1.3.0`	**Bug Fix:** Tracker loses horse data on a player's death.
	`1.0.0`	Recipe now uses Shining Amethyst Shards.

`1.16.5`	`5.3.21`	**Deprecated Recipe (1.16)**
