

Fences

Description: SWEM fences come in 3 variants; English, Western & Pasture. These fences can be customised with the fence tool.

Details:

Renewable:	Yes
Stackable:	Yes (64)
Tool:	Axe (Any)
Blast Resistance:	N/A
Hardness:	N/A
Luminant:	N/A
Transparent:	Yes
Flammable:	No
Flammable (Lava):	No

Obtaining

Crafting

English

English fences come in a single (black & white) color.
4 English fences can be crafted with 3 Planks (any), 2 Sticks and 1 Black Dye.

A crafting grid diagram showing the recipe for an English fence. On the left is a 3x3 grid. The top row contains three wooden planks. The middle row contains two wooden sticks and one black dye. The bottom row contains one wooden plank and two empty slots. A large grey arrow points from this grid to the right, where a single English fence (a black and white striped post-and-rail fence) is shown inside a square frame.

Western

Western fences come in 6 Minecraft wood types, plus Whitewash.

8 western fences can be crafted with 6 Planks (chosen wood type), 1 Slab and 1 Stick.

Pasture

Pasture fences come in 6 Minecraft wood types, plus Whitewash.

8 pasture fences can be crafted with 6 Planks (chosen wood type) and 2 Sticks.

Usage

SWEM fences are similar to (vanilla) Minecraft fences in all but one way. Just like Minecraft fences, they are technically 1.5b tall, meaning entities cannot step or jump over them. They are recognized as a barrier, so cannot be pathed through and will contain entities within it. Unlike Minecraft fences, SWEM fences can be altered between a full-fence and a half-fence (cut down) state. This cutting down of fences can be achieved using a [Fence Tool](#). This can be used in many ways:

- Short dressage or competition arena borders
- 1.5 Height pasture fences (1 high fences look really short compared to SWEM horses)

- A variety of decorative ideas including hooks and light posts
- [English] Framing stall windows, dividers and overhang support

Western Fence

Western fences have a full-height straight panel across the top of it, with two thinner support panels lower on the fence. When a corner is created, western fences have an interesting diagonal post design. Right-click a western fence with a [fence tool](#) in hand to cut down.

Pasture Fence

Pasture fences are visually very similar to Minecraft fences, but with slightly sturdier (thicker) panels and a half-fence version. Right-click a pasture fence with a [fence tool](#) in hand to cut down.

English Fence

English fences are unlike any other SWEM or Minecraft fence. They have a white-framed panel design with black painted wood bars. They come in edge or connector pieces (no corner) and often require use of the fence tool. English fences are sensitive to direction, so you may need to move around to place the corners in the right direction **or** use the fence tool:

- **Shift + Right-click:** Rotate a corner section to a different direction
- **Right-click:** Toggle between corner and connector designs

English fences cannot connect around a corner like normal fences, so a post made from blocks would be recommended for pastures using English fences.

English fences are not 1.5b like other fences, and can be jumped unless designed to be double height.
