

Lead & Anchor

Description: A lead and anchor is an improved version of Minecraft's lead that allows players to lead more entities, and hitch (tie up) on any solid surface.

Removed in version 1.18.2-1.3.0+. The lead and anchor function has been incorporated into Minecraft's lead.

Details:

	Rarity color:	Common
	Renewable:	Yes
	Stackable:	Yes (64)
	Durability:	None

Obtaining

Crafting

Leads come in a single (brown) color.

Vanilla Recipe: Two leads can be crafted with 1 Slime and 4 String.

Two leads can be crafted with 1 Star Worm Goop and 4 String.

Usage

Leading

Right-click any passive entity with a lead in hand to lead them. Villagers must be **shift** right-clicked to connect to a lead.

Anchoring

Right-click a block or surface to attach the anchor - this will create a small, temporary ring hitch on the ground. Anchors can be placed on the ground, on the side of blocks or underneath blocks.

Right-click the ring to untether the mob, this will drop a lead.

Shown: SWEM horse hitched to the ground with an anchor connection.

Known Issues

If you find an issue, please report it to our bugs channel on [Discord](#). We ask that you look to see if your issue was reported first!

Changelog

View Changes

This is not a complete list of version changes / fixes. It is a changelog of relevant wiki-related version information.
