Usage

Saddles are part of a tack set required to ride tamed SWEM Horses. Using a saddle is the third tack item, and requires a blanket (saddle blanket) to be equipped.

Right click a tamed SWEM Horse with a saddle in hand to equip it - or open the horse's GUI menu (shift + right click with an empty hand) to place the item in the designated tack spot. If a horse already has a saddle on, you can easily 'hotswap' it for another by shift + right-clicking with the new saddle in hand.

> Tack-equip order: Bridle > Blanket > Saddle > Girth Strap. Optional: Breast collar, Leg Wraps, Horse Armor, Saddle Bag

Saddles do not offer any perks or buffs. You can use any saddle with any other riding tack pieces to mix English, Western & Adventure. The only exception is Adventure Saddles require a full matching set to use Horse Armor, but once the armor is put on the saddle can be 'hotswapped' out for different versions.

Girth Strap

A saddle requires a Girth Strap to remain equipped - if there is no girth strap the saddle has a 20% chance of falling off every second. When a saddle falls off, the player will be dismounted.
When untacking, if the saddle is removed before the girth strap it will fall to the ground.

Breastcollar

When untacking, if the saddle is removed before the Breast collar it will fall to the ground.
