Trivia

Salamarty is coat 0 and is a 'code buffer' as a 0 must exist. They were also one of the absolute last coats to be added into the mod ahead of V1 release - so close they almost did not make it in.

Those who watch the SWEM team's *Queen's Cavalry* stream will know Salamarty as a cantankerous Platypus of Hannah's who is always escaping in search of water or a new home - often being found in places you would not expect or where he shouldn't be (like Delphi's kitchen...)
