Trivia

Toothbrush is the appreciation coat of staff member and moderator Aali (Boatyboatman / Boat). Boat is best known for two things on the beta server:

- 1) Their animal names are always unusual and Toothbrush makes a regular appearance.
- 2) Toothbrush used to change coats regularly, as Boat could not settle on any single one.

Boat, partly out of staff constant confusion around whether Toothbrush was Toothbrush or not and partly for the many late nights and hours put into SWEM, was offered a staff appreciation coat to choose something they could use for a more permanent Toothbrush appearance.

Hannah made the Toothbrush coat personally for Boat.

Toothbrush bears similarities to Sweetboi, who was also primarily created by AlaharranHonor, though his coat is markedly less blue, lacks a dark face mask, and he is a Grulla (Black-base Dun) rather than a Blue Roan (Black-base Roan). Both coats have extensive Tobiano markings.
